

mission

U.S. Air Force Medical Service

The U.S. Air Force Medical Service has a budget of \$6.9 billion and runs 75 hospitals and clinics providing care to over 2.6 million beneficiaries.

The U.S. Air Force Medical Services has deployed Concept Searching technologies to achieve the benefits of automatically meta-tagging documents and records. Information is now retrievable using concepts versus keywords, reading, tagging and information classification costs are eliminated, and information retrieval costs are dramatically reduced.

connect

Local UK Government

The Tamworth Borough Council, Winchester City Council, Mendip District Council, Preston City Council, all utilize Concept Searching technologies integrated into SearchMaster by Web-Labs to deliver relevant information to constituents and manage their sites through automatic classification.

serve

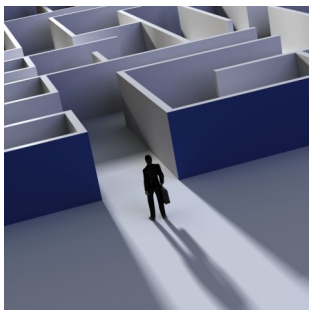

U.S. Department of Agriculture

The U.S. Department of Agriculture – Research, Education & Economics Information System (REEIS) is a source of information on the research, education and extension programs, projects and activities of the U. S. Department of Agriculture (USDA) and its partner institutions. REEIS offers Concept Searching technologies to web site researchers.

original

Finding Digital Assets

COMPU-DATA International, LLC (CDI) a leading provider of enterprise content and information management products has incorporated Concept Searching technologies into their newest release of their DigitalAsset Finder™ (DAF) product.

CDI's products automate the collection, fusion, analysis and dissemination of structured and unstructured information by aggregating items from broad and disparate information repositories and delivering results through precision search and categorization. CDI has been providing solutions for the both the public and private sector for over 20 years. For more information on CDI please visit their website at www.cdilac.com.

leader

Concentra

Concentra, a Concept Searching partner, is a leader in advanced analytics and software development. They specialize in the design, development and support of innovative tools and solutions that help clients increase profitability, streamline operations and improve collaboration. Their solutions are scalable, highly usable and designed for ongoing benefit capture.

As one of the UK's first Microsoft Gold Certified Partners to achieve the Enterprise Search competency they have extensive experience in delivering complex search solutions. Concept Searching's tools substantially extend the search capability of MOSS (Microsoft Office SharePoint Server). Concentra works with a wide range of companies across many industry verticals, with a particular expertise in health-care and the public sector. Clients include UK Sport, Deloitte, American Express, Betfair, Permira, NHS, British Standards Institution, Aspen Re, National Institute of Health Research, National Express, Pfizer and Roche. For more information please visit their website at www.concentra.co.uk.

discovery

RMDA

The U.S. Army Records Management and Declassification Agency (RMDA) implemented Concept Searching within its Digital Asset Management Platform. The RMDA utilized a Concept Searching partner, COMPU-DATA to implement its Digital Asset Management solution within the agency. The integrated solution will be used to support researchers in discovery tasks around Post Traumatic Stress Disorder (PTSD).
