Concept Searching and DocQnet International Announce Reseller Partnership

Alliance Delivers

Superior access to business critical information and content

Cape Town, SA and Johannesburg, SA – August 7 – Concept Searching, providers of a global search technology that enables automatic classification, semantic metadata generation, and taxonomy management and DocQnet International, a leading provider of technology and integration services specializing in Life-cycle Information and Content Management today announced a partnership to offer the Concept Searching product suite as part of DocQnet’s comprehensive solutions and services offerings.

DocQnet’s solutions provide organizations with a sound platform for corporate governance and risk management, as well as enabling organizations to enhance efficiency and improve customer service. The addition of Concept Searching to the DocQnet solution range strengthens their offering by adding a leading edge Search technology. This partnership allows DocQnet to provide an even more comprehensive solution to its customers.

The strategic partnership will combine DocQnet’s technologies and expertise and Concept Searching’s software to offer clients a unique solution that provides rapid access to relevant business critical information and content. Concept Searching’s ability to classify and see ‘concepts in context’ when searching and retrieving information, significantly increases relevance and precision enabling organizations to increase productivity, reduce costs and gain competitive advantages.

“It is my pleasure to have DocQnet as a strategic Concept Searching partner,” said Martin Garland, President North America and International Operations. “As a technology leader in South Africa, DocQnet is well known and highly respected for their quality, experience, and industry expertise in the life-cycle management of enterprise information and content. This alliance builds upon the strengths of both companies and enables DocQnet to offer a solution that will provide competitive advantage to their clients.”

About DocQnet International

DocQnet had its origins in 2002 in the Enterprise Content Management (ECM) space. Today the company is a highly focused provider of solutions and services that manage the life-cycle of unstructured information – helping to prevent re-work, ensuring adherence to standards and compliance as well as improving the efficiency of operations.

DocQnet achieves this through its unique inventory of deep subject matter expertise, broad technical know-how and business acumen. This has made DocQnet solution provider of choice on enterprise life-cycle information management projects that require complex integration.

About Concept Searching

Founded in 2002, Concept Searching's software products deliver advanced search, auto-classification, taxonomy management and advanced metadata tagging solutions from the desktop to the enterprise. Concept Searching is the only statistical metadata generation and classification software company in the world that uses concept extraction and compound term processing to significantly improve access to unstructured information. Headquartered in the U.K. with offices in the U.S. and South Africa, Concept Searching solves the problem of finding, organizing, and managing information capital. For more information about Concept Searching's solutions and technologies please visit www.conceptsearching.com.
